

Housing Options

You may select from a continuum of housing services in the CHCS Housing Options program. Adults living with a chronic mental illness will be provided a safe and supported environment.

Depending on which service best fits your needs, you may also work with staff to determine goals for your future. You will receive assistance in accessing services and resources to help you achieve your goals.

Rental Services administers the Bridging Rental Assistance Program (BRAP) and Shelter Plus Care rental assistance programs. CHCS also provides homeless transitional housing as well as permanent housing for the chronically homeless.

Community Rehabilitation Services offers daily staff support, medication administration and education, Community Integration Services, Skills Development Services and Daily Living Support Services.

Adult Residential Group Homes include 24/7 staffing, medication administration and education, and assistance and skills teaching with daily activities such as bathing, dressing, eating, cooking, cleaning and laundry.

Services for Adults

Your needs and goals are the primary focus of any service you receive at CHCS.

You and your provider will create an individualized treatment plan and will work with you to develop goals and ask you how to best reach those goals.

Your provider will monitor your progress as well as ask your input of how you are improving and what can be done better to enhance the likelihood of positive outcomes for you.

This regular feedback between you and your provider will help you get what you need from the services.
