

Targeted Case Management

You and your family are at the center of Targeted Case Management services. Your child will receive services that include:

- **Assessing the medical, social, educational and other needs of your child and family**
- **Identifying and planning the services necessary to address needs**
- **Advocating and coordinating services on behalf of the child and family**
- **Monitoring and evaluating the services provided**
- **Assisting the family with discharge planning**

You and your child will work with experienced staff who are trained in the client-directed, outcome-informed approach. This approach is a success with families facing multiple challenges related to a child's needs and provides timely and lasting results. Staff work with your family to advocate, support, problem solve, coordinate and listen to achieve the best possible treatment.

Call now to see how Targeted Case Management can benefit your family.

Services for Children

At Community Health and Counseling Services, we focus on achieving the best fit between your child's needs and our services.

Your child will receive services to promote healthy growth and development.

Services are part of a comprehensive and integrated system of care that is child centered, family oriented and community based.

You and your family are connected to professionals that provide family focused services which are goal oriented and designed to meet mutually identified needs of your child and your family.

Your child will be offered services that integrates CHCS, other community resources and families in a problem-solving team with the primary focus on the best treatment for child and family.

For more information on how you and your family may receive services through CHCS, call:
